

## Subtracting Fractions with Wholes:

$$2\frac{2}{4} - 1\frac{2}{8} = \boxed{\phantom{000}}$$

$$2\frac{2}{4} - 1\frac{2}{8} =$$

$$1\frac{2}{4} - \frac{2}{8} =$$

$$1\frac{2}{4} - \frac{1}{4} =$$

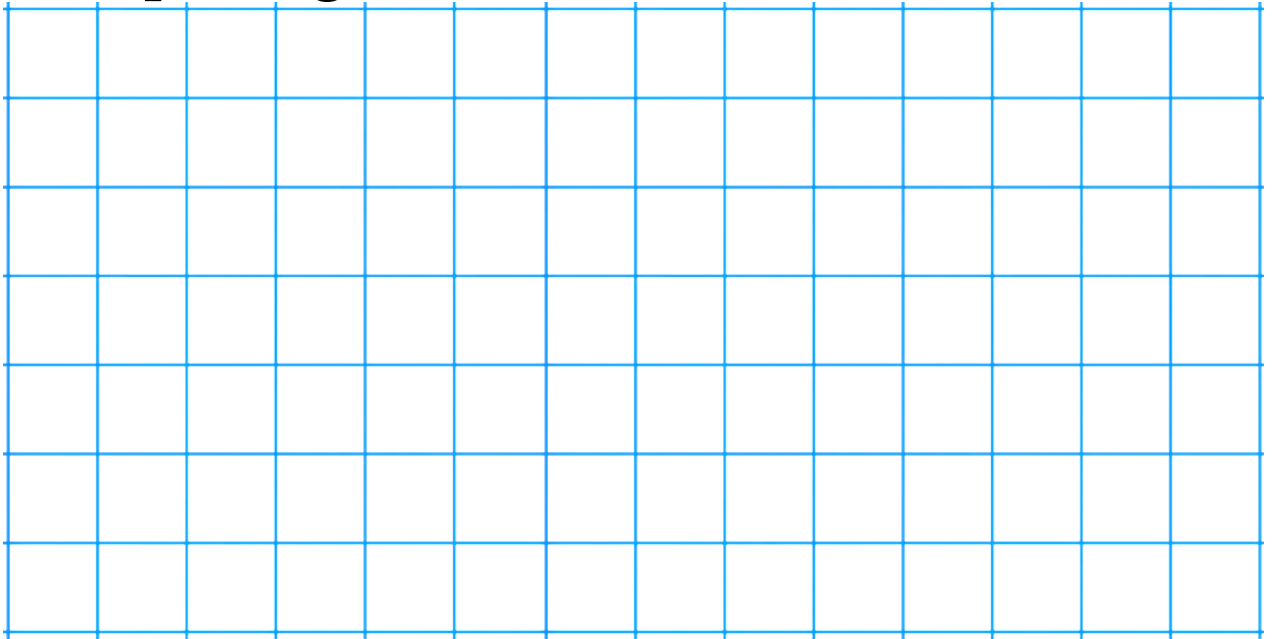

$$8\frac{5}{6} - 5\frac{2}{3} = \boxed{\phantom{000}}$$

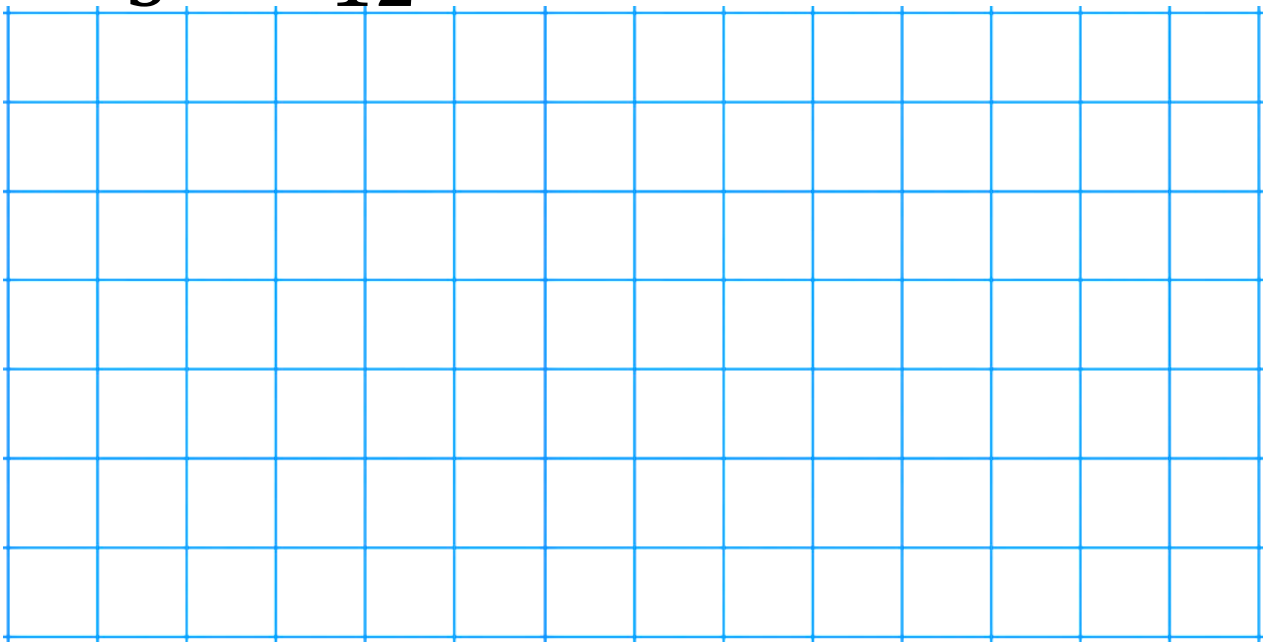

Subtracting Fractions with Wholes:

$$6\frac{3}{4} - 2\frac{2}{8} = \boxed{\phantom{000}}$$

$$4\frac{2}{3} - 3\frac{2}{12} = \boxed{\phantom{000}}$$
