

## Subtracting Fractions with the Same Denominator

$$\frac{6}{7} - \frac{5}{7} = \boxed{\phantom{00}}$$

$$\frac{4}{5} - \frac{2}{5} = \boxed{\phantom{00}}$$

## Subtracting Fractions with the Same Denominator

$$\frac{4}{4} - \frac{1}{4} = \boxed{\phantom{00}}$$

$$\frac{7}{8} - \frac{3}{8} = \boxed{\phantom{00}}$$

Create Your Own  
Subtracting Fractions with  
the Same Denominator:

$$\frac{\square}{\square} - \frac{\square}{\square} = \square$$

$$\frac{\square}{\square} - \frac{\square}{\square} = \square$$

Create Your Own  
Subtracting Fractions with  
the Same Denominator:

$$\frac{\square}{\square} - \frac{\square}{\square} = \square$$

$$\frac{\square}{\square} - \frac{\square}{\square} = \square$$
